

# Reduce waste, choose coreless!

We've thrown away the core!

At Charters, we are doing our bit for the environment. That is why we are pleased to introduce our coreless **enviro93** thermal paper roll, which helps reduce waste, with no compromise on printing performance. Whatsmore our coreless paper roll offers a guaranteed 93 metres in length and is made from FSC® certified paper.

**NO CORE!  
NO WASTE!**

#### Better value for money

Our thermal paper rolls are cut to 93 metres everytime, which means you get exactly what you pay for.

#### Better for the environment

Our unique coreless roll reduces waste, with no compromise to the performance of the final product.

#### Better print performance

Our rolls are approved by major printer manufacturers, including Epson, which ensures you get excellent performance.

#### Better for your health

The paper used in all of our thermal paper rolls is Bisphenol-A (BPA) free, which offers customers peace of mind.

#### Better for Australia

We manufacture our thermal paper rolls right here in Australia, ensuring you receive consistent supply.
